Dear Universal Creative Internship Recruiters,

I am excited to apply for the Summer 2026 internship program at Universal Creative. As a Computer Science student at the University of Central Florida with hands-on experience in systems, data, and operations, I am eager to contribute my technical background and problem-solving skills to projects that shape the future of themed entertainment.

In my current role as a Corporal and Command Center Operator within Security at Universal Orlando Resort, I have learned the importance of accuracy, teamwork, and composure under pressure. Whether coordinating dispatch, mentoring new officers as a Field Training Officer, or documenting incidents to support investigations, I have developed strong systems thinking and communication skills—qualities that align closely with Universal Creative’s mission to deliver safe, reliable, and innovative experiences.

At UCF, I have gained proficiency in Python, C, C++, Java, and SQL while completing projects such as a predictive text assistant, a MIPS CPU simulator, and a stack-based virtual machine. These experiences strengthened my ability to break down complex problems, design efficient solutions, and validate results through testing. I am particularly interested in Systems Engineering, ATI/R&D; Integration, and Data Science internships because they combine my technical skills with my passion for innovation.

What excites me most about Universal Creative is the opportunity to contribute to projects that inspire and delight millions of guests. I would welcome the chance to bring my dedication, adaptability, and enthusiasm for systems and data to your team.

Thank you for your time and consideration. I look forward to the possibility of contributing to Universal Creative this summer.

Warm regards,

Rodolfo “Rudy” Ruiz
